# CALL FOR PAPERS

The 14<sup>th</sup> International Congress on Logistics and SCM Systems

*"Smart Supply Chain in an Uncertain World –  
The Past, the Present, and the Future"*

## THEME

The theme of ICLS 2019 is smart supply chain in an uncertain world. Uncertainty may come from the volatile global trade environment or result from the impacts of extreme weather caused by climate change. Innovation through new ICT can help lessen the problems arising from such uncertain business environments and engender a supply chain strategy and operations with new business models and technology.
